EXCELLENTIA PER STUDIA

Lee Academy is one school with two campuses, located in Lynden and Sheffield.

Established in 1996, Lee Academy combines academic excellence and an ideal rural surrounding.

With small classes, highly intelligent teachers, an exceptional location and high academic standards, Lee Academy is one of the finest academic elementary schools in Ontario.

THE EARLY YEARS

Lee Academy was founded on the belief that there is a need in our society for a school which has high expectations of the students, both academically and socially, to foster in the children confidence and high self-esteem. The education of our children must prepare each of them to develop into an intelligent, prosperous and productive member of society.

To build the finest academic elementary school in Ontario was, and remains, their goal. Each year the school has grown in its enrolment, in its programmes, in its staff and in its facilities.

NOW AND INTO THE FUTURE

Lee Academy is a school that has never been like any other school. Our students receive a personalized education from teachers who are among the finest in Ontario. Our students and staff define us. Our families support us. We look forward to offering the best programmes to their children, grandchildren and great grandchildren.

Lee Academy is one school with two campuses, located in Lynden & Sheffield. Both campuses embrace all the foundations that make Lee Academy exceptional. Perseverance and hard work reap great rewards.

OUR PHILOSOPHY

At Lee Academy each child is given an academically challenging education based on reading, writing and arithmetic. Recognizing that ability varies from child to child, we teach these fundamental skills as early as possible, starting in kindergarten and having all students reading and doing basic mathematics in Grade 1.

In addition, each student's programme includes education in music, art, and specialty subjects such as French, physical education, science, computer, and environmental studies for an engaging, well-rounded curriculum.
